WORK EXPERIENCE

VIDEOWINDOW | Frontend Developer

July 2023 - current

Remote

Videowindow is a Dutch-based innovative startup. At Videowindow we're working to redefine glare control by adding transparent video displays to windows and creating smart content which automatically adjusts itself to light conditions. In my role at Videowindow, I've: Developed frontend interface for the internal API using TypeScript, React, Bulma, and Apollo GraphQL; Upgraded the React-based CMS frontend to meet industry standards; Led UI design with a focus on quality and UX; Collaborated with backend developers for smooth integration; Maintained and improved the codebase for reliability and efficiency.

EDUCATION

I hold both a Bachelor's and Master's degree in Humanities, but not yet in Tech. Over the past two years I've been dedicated to studying this field daily, starting with algorithm and programming basics, and advancing to complex JavaScript concepts, React patterns, and various libraries. To further enhance my knowledge and competitiveness in the tech industry, I am pursuing my Bachelor's degree in Software Engineering at the Technical Institute of Amsterdam—AmsterdamTech.

PROJECTS

All my personal projects, developed alongside my role at Videowindow, can be explored on my portfolio website : [portfolio.online](#)

SKILLS

JavaScript; HTML; CSS; Sass;
React.js; jQuery; TypeScript;
GraphQL, Apollo Client, React Query;
Bulma, Tailwind CSS, Styled Components;
Figma, Canva; Git, GitHub, Gitlab;

LANGUAGES

Besides my native language—
Georgian, I am fluent in both English
and Russian.
Additionally, I am currently in the process
of acquiring proficiency in German.
